AMD AI DEVMASTER - TRACK 1

BrandPilot Local

One product image. One campaign system. One accountable human decision.

MOCK-FIRST PRODUCT

Talal Khawaja | Aqeela Urooj

AMD Radeon + ROCm evidence, without overstating the public edge

PROBLEM

Campaign creation is fragmented by default.

PROMPT	A visual idea without brand context
DESIGN	Formats and composition split elsewhere
COPY	Claims and calls-to-action drift
REVIEW	Decisions disappear into chat

The cost

Slow iteration
Weak traceability
Unnecessary asset exposure
Review without accountability

SOLUTION

One asset becomes an accountable campaign.

01

Upload

Validated product image

02

Direct

Audience, brand, formats

03

Create

Four labelled concepts

04

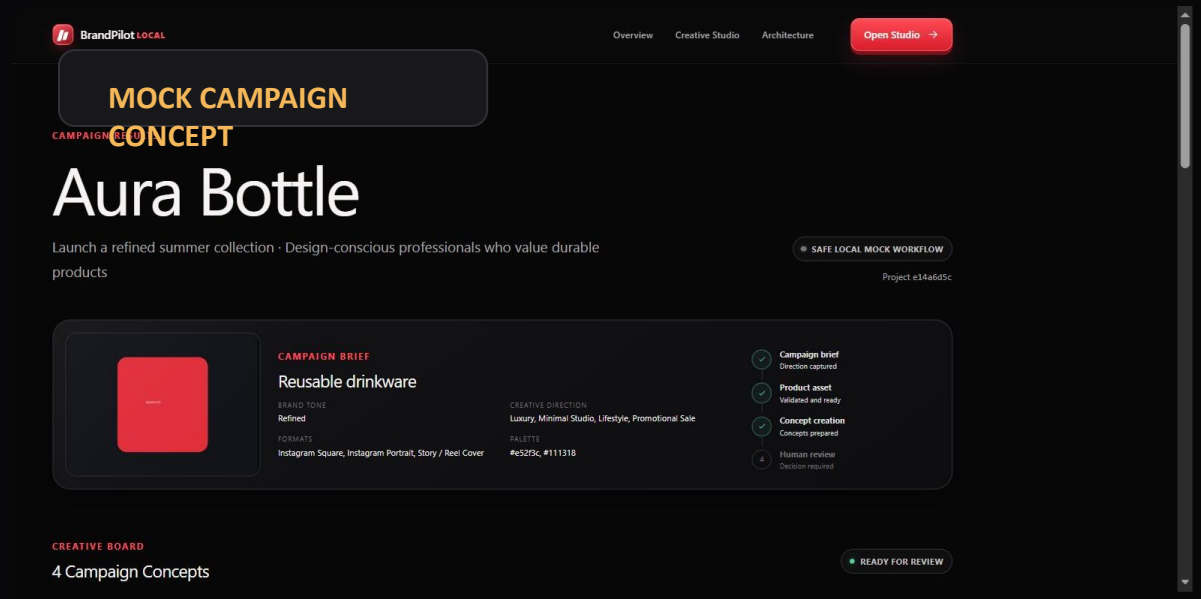

Review

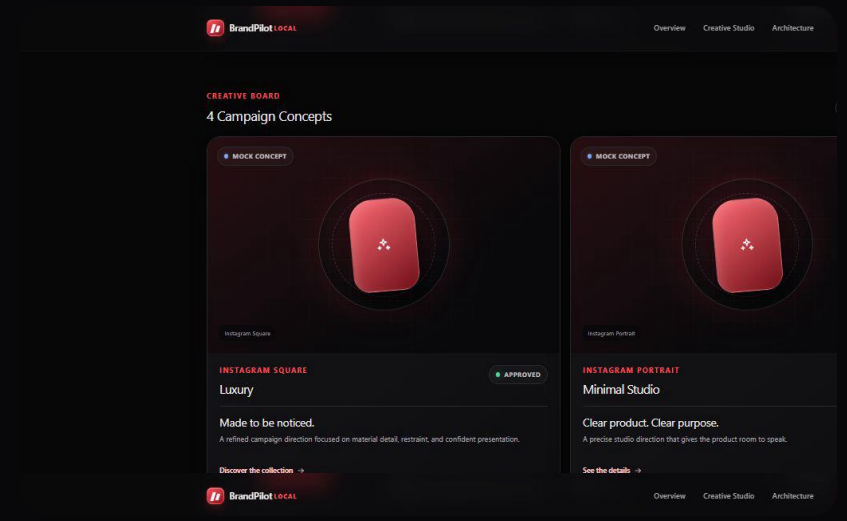

Persisted human decision

PRODUCT EXPERIENCE

The review board makes provenance visible.

Mock stays labelled.

Approve, reject, request changes, edit copy, regenerate, and refresh without losing the decision.

ARCHITECTURE

Mock remains default. Radeon remains explicit.

PRODUCT + BRIEF
Validated input

NEXT.JS
Responsive studio

FASTAPI
Persistence + review

ROCM WORKER
Single lazy GPU job

AMD RADEON
SDXL via PyTorch/HIP

Mock path

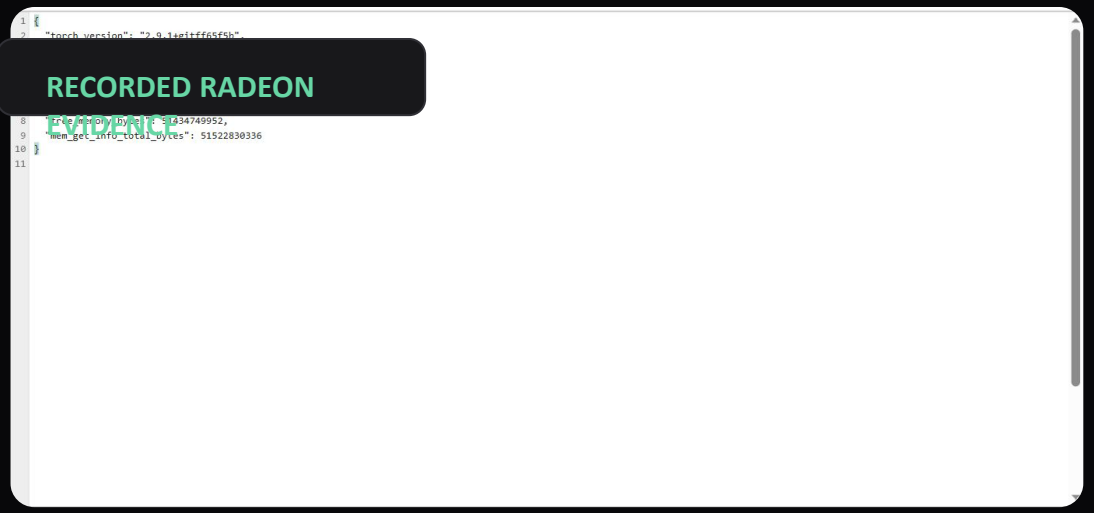

Always available
No GPU dependency

EXPERIMENTAL OPT-IN

Bearer auth · explicit CORS · loopback bind · one job · no CPU/mock fallback

AMD RADEON + ROCM

Real SDXL image-to-image completed on Radeon.

SDXL base 1.0 exact revision pinned

768 × 768
15 steps
fp16

gfx1100 **48 GiB reported** **HIP 7.2**

The real image shown here was generated during the verified cloud session.

MEASURED PERFORMANCE

The evidence records time, memory, and integrity.

132.295 s

cold model load

222.111 s

generation

13.41 GiB

peak allocated

14.31 GiB

peak reserved

Pinned run

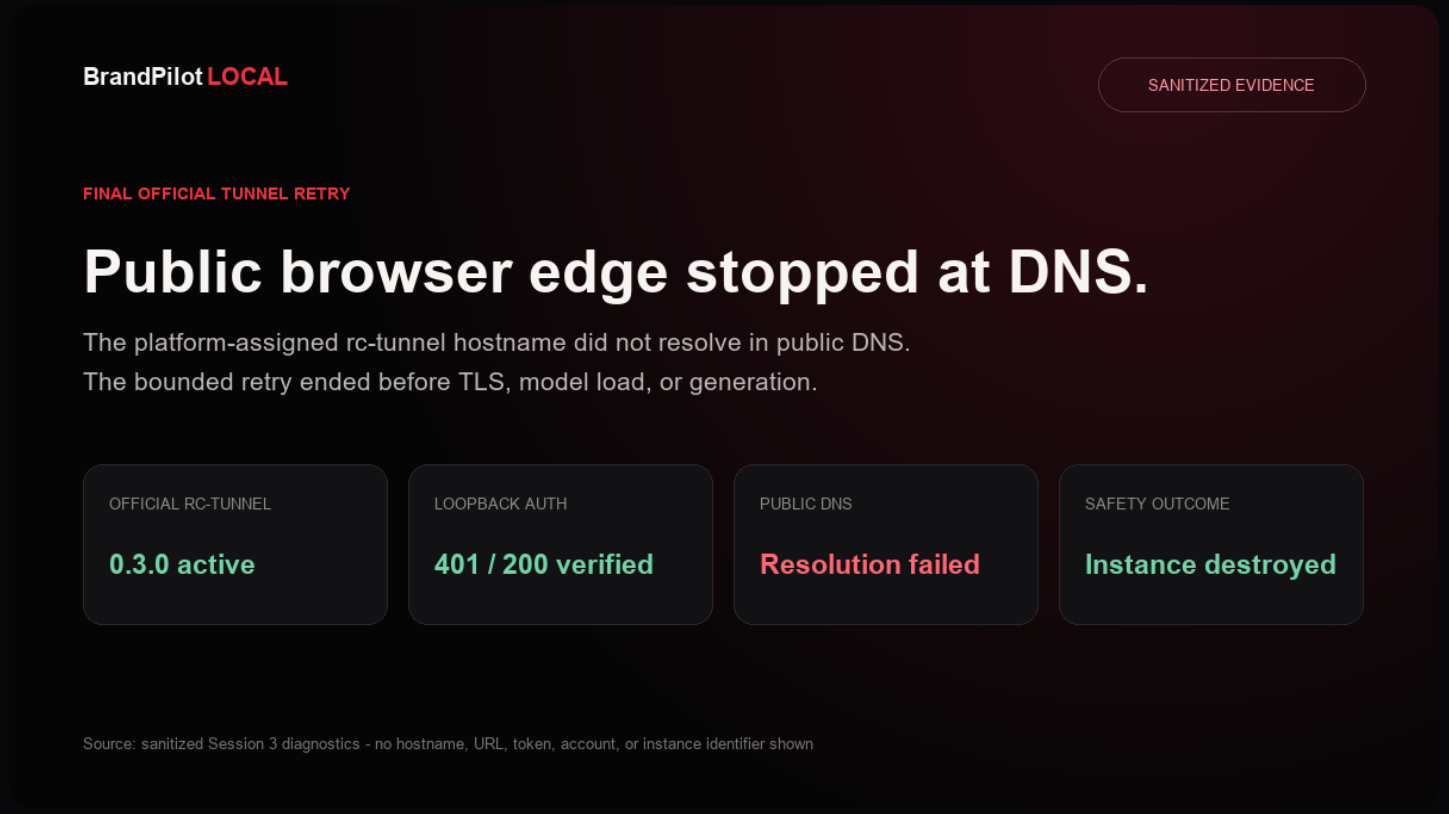

768 × 768
15 steps
strength 0.35
guidance 6.5
seed 20260725

Output SHA-256

bce21d016a8179ac4ddabcbf5869a71eacf03565948d0d1f97d24e279b125452

HONEST VALIDATION

Public browser edge stopped at DNS.

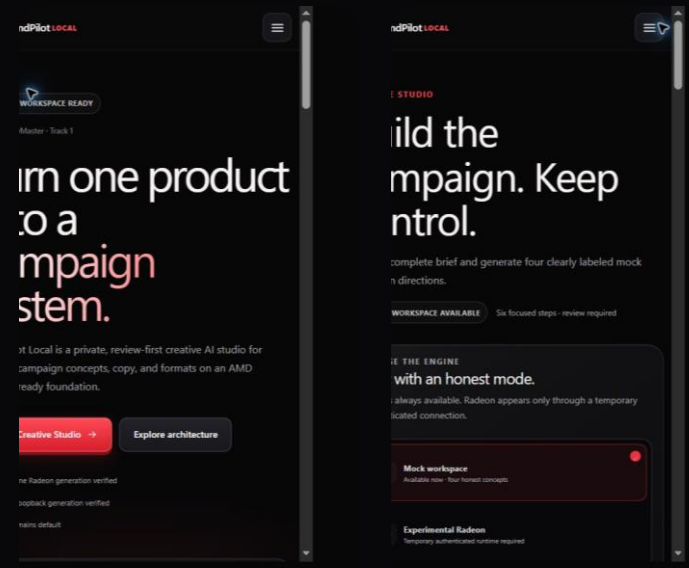

Standalone SDXL	VERIFIED
FastAPI loopback	VERIFIED
rc-tunnel 0.3.0	VERIFIED
Chrome TLS/auth/CORS/upload	VERIFIED
Protected output through edge	BLOCKED - DNS

No unofficial tunnel. No TLS bypass. No fabricated success.

PRACTICAL VALUE

Generation becomes a reviewable brand workflow.

Independent brands	Launch concepts without a fragmented toolchain
In-house teams	Adapt one campaign across formats
Creative studios	Explore directions before production
Privacy-conscious teams	Keep the default workflow controlled

Responsive by design

BRANDPILOT LOCAL

Practical today.
Disciplined about tomorrow.

Verified

Real SDXL on Radeon + ROCm
Authenticated FastAPI loopback generation
Human review and responsive product workflow

Next measured phase

Compare base SDXL with IP-Adapter plus masking/compositing for product preservation - only after submission.
