Project Specification Document

Project: InterviewIQ AI (HireMate AI)

Application Scenarios
A web-based AI-powered interview preparation platform for students, freshers, developers, and job seekers. It offers AI voice interviews, resume-based questions, coding assessments, DevOps terminal simulations, confidence analysis, and personalized learning feedback.

System Architecture
Frontend (React + TypeScript + Vite) → Firebase → Gemini AI → Interview Evaluation Engine → Analytics Dashboard

Core Capabilities
AI Voice Interview
Resume-Based Questions
Coding Assessment
DevOps Terminal Simulator
Confidence Analysis
AI Scorecard
Learning Roadmap

Model & Local Deployment
Runs locally using Node.js and Vite. Deployable on Firebase Hosting, Netlify, or Vercel.

Technology Stack
React, TypeScript, Vite, Tailwind CSS, Firebase, Node.js, Gemini AI, Web Speech API, Recharts.

Future Enhancements
AI HR Avatar, ATS Resume Checker, Mobile App, Recruiter Dashboard, Multi-language Support.
