HireSense – AI-Powered Resume & Job Matching Platform

AMD AI DevMaster Hackathon 2026
Track 2 – Agentic AI
Participant: Niranjan S

Problem Statement

Job seekers often struggle to tailor resumes to job descriptions, understand ATS compatibility, and identify missing skills.

Solution Overview

HireSense analyzes resumes, compares them with job descriptions, identifies skill gaps, calculates ATS compatibility, and provides personalized recommendations.

Application Scenario

Useful for students, fresh graduates, and professionals before applying for jobs.

System Architecture

Frontend: React.js
Backend: Spring Boot (Java)
Database: PostgreSQL

Core Features

Resume Upload & Analysis
Job Description Analysis
ATS Score
Skill Gap Detection
Personalized Recommendations

Technology Stack

React.js, Spring Boot, PostgreSQL, Git, GitHub

Local Deployment

Clone repository, configure PostgreSQL, start Spring Boot backend, then React frontend.

AMD GPU / ROCm

Future versions can leverage AMD Radeon GPUs and ROCm for AI inference acceleration.

Conclusion

HireSense helps improve employability through AI-powered resume analysis and job matching.
