AMD AI DEVMASTER HACKATHON • TRACK 1 — MULTIMODAL AI

AudioSight

Turn video into a world everyone can hear.

SCENARIO 01 • PERSONAL & FAMILY MEDIA

HEAR THE MOMENTS THAT MATTER

Blind and low-vision people — independently or with family — can turn home videos into private audio-described soundtracks.

SCENARIO 02 • ACCESSIBLE CONTENT CREATION

CREATE DESCRIBED FILMS FASTER

Professional and volunteer creators can generate, review, edit, and deliver narration for film, television, education, and museums.

FROM BLANK TO IMAGINATION

Golden light settles over the mountains as two figures walk home together.

Audio description helps blind and low-vision audiences understand the action, feel the atmosphere, and share the beauty of every story.

UNDERSTAND • FEEL • IMAGINE • SHARE
